ELSEVIER

Cold Regions Science and Technology 24 (1996) 375–376

cold regions science and technology

Contents Volume 24 (1996)

Review

A review of sea ice density
G.W. Timco and R.M.W. Frederking 1

Research papers

Dynamic impact between a viscoelastic ice floe and a rigid structure
L.W. Morland 7

On the generation of internal waves beneath sea ice by a moving load
D.G. Duffy 29

Wing crack models of the brittle compressive failure of ice
W.A. Nixon. 41

Winter-time convection in open-graded embankments
D.J. Goering and P. Kumar 57

The effects of individual ridging events on the ice thickness distribution in the Arctic ice pack
M.A. Hopkins 75

A study of the morphology of a discontinuous section of a first year arctic pressure ridge
R.G. Bowen and D.R. Topham 83

The effect of climate warming on the Qinghai–Tibet Highway, China
C. Tong and Q. Wu 101

Stress interaction between multiple crevasses in glacier ice
C. Sassolas, T. Pfeffer and B. Amadei. 107

Viscosity of fluidized snow
K. Nishimura 117

Simulation and observation of ice formation (freeze-over) in a lake
X. Fang, C.R. Ellis and H.G. Stefan 129

Snow and ice reflectance spectra of the Nansen Ice Sheet surfaces
G. Zibordi, G.P. Meloni and M. Frezzotti 147

Triaxial tests on crushed ice
S.K. Singh and I.J. Jordaan 153

Preliminary results from fatigue tests on in situ sea ice beams
T.G. Haskell, W.H. Robinson and P.J. Langhorne 167

The effects of localized deformation on melting processes in ice
C.J.L. Wilson, Y. Zhang and K. Stuwe 177

Electrical freezing potentials measured in a pingo growing in the western Canadian Arctic
V.R. Parameswaran and J.R. Mackay 191

Application of foam insulation for remediation of degraded permafrost
V.N. Feklistov and N.L. Rusakov 205

Ice fracture and spalling in ice;b1structure interaction
B. Zou, J. Xiao and I.J. Jordaan 213

Elasto-delayed-elastic simulation of short-term deflection of fresh-water ice covers
N.K. Sinha and B. Cai 221

Acoustic emission during fatigue experiments on first year sea ice
P.J. Langhorne and T.G. Haskell 237

Environmental factors in iceberg collision risks for floating systems
M. Fuglem, I. Jordaan, G. Crocker, G. Cammaert and B. Berry 251
2-D frost action modeling using the segregation potential of soils
J.-M. Konrad and M. Shen 263
Analysis of medium scale ice-indentation tests
R. Meaney, I.J. Jordaan and J. Xiao 279
Long-term lake water temperature and ice cover simulations/measurements
X. Fang and H.G. Stefan 289
Application of damage mechanics to ice failure in compression
J. Xiao and I.J. Jordaan 305
Sea ice and iceberg observations in the western Barents Sea in 1987
S. Løset and T. Carstens 323
Optical measurements of frazil concentration
W.S. Pegau, C.A. Paulson and J.R.V. Zaneveld 341
An airborne electromagnetic system on a fixed wing aircraft for sea ice thickness mapping
J. Multala, H. Hautaniemi, M. Oksama, M. Leppäranta, J. Haapala, A. Herlevi, K. Riska and M. Lensu 355

Contents Volume 24 375
